Error Comments: We reviewed the Year to Year change for the 22-23 child count data. We had a significant increase in referrals and eligible children in our system in 21-22 because of the COVID 19 pandemic. This led to an increase in the child count and an increase in race/ethnicity breakdowns. Our referral and eligibility rates are returning to pre pandemic level which explains their decrease in the current reporting year. We have determined it to be accurate and will continue to monitor.
